	Rashmi K. Sharma	3651					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
1) Responsive to communication(s) filed on 23 No	ovember 2005.

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969). A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b). Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-20 of copending Application No. 10/743,426. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both have a feeder bowl dispenser with plural dispensing paths, a controller for regulating said dispenser, rotating said dispensing paths with a rotation drive, a vibrating device for agitating said dispensing paths.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-13 of

copending Application No. 10/743,435. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both have a feeder bowl dispenser with plural dispensing paths, a controller for regulating said dispenser, rotating said dispensing paths with a rotation drive, a vibrating device for agitating said dispensing paths.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-10 of copending Application No. 10/743,440. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both have a feeder bowl dispenser with plural dispensing paths, a controller for regulating said dispenser, rotating said dispensing paths with a rotation drive, a vibrating device for agitating said dispensing paths.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-55 of copending Application No. 10/601675. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both have a feeder bowl dispenser with plural dispensing paths, a controller for regulating said

dispenser, rotating said dispensing paths with a rotation drive, a vibrating device for agitating said dispensing paths.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-16 of copending Application No. 10/743425. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both have a feeder bowl dispenser with plural dispensing paths, a controller for regulating said dispenser, rotating said dispensing paths with a rotation drive, a vibrating device for agitating said dispensing paths.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-40 of copending Application No. 10/601,674. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both a feeder bowl dispenser with plural dispensing paths, a controller for regulating said dispenser, rotating said dispensing paths with a rotation drive, a vibrating device for agitating said dispensing paths.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-31 of copending Application No. 10/601,670. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both a feeder bowl dispenser with plural dispensing paths, a controller for regulating said dispenser, rotating said dispensing paths with a rotation drive, a vibrating device for agitating said dispensing paths.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments filed 1/12/06 with respect to the previous Office Action have been fully considered and are persuasive. The previous rejection has been withdrawn.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rashmi K. Sharma whose telephone number is 571-272-6918. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Crawford can be reached on 571-272-6911. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
